## SOFTWARE ENGINEER

### SUMMARY

I am a self-taught software engineer with the 'you build it, you run it' mindset and a passion for front-end development. I have over three years of experience in TypeScript, React, and Redux. I'm currently working at loveholidays where I am expanding my knowledge and learning technologies such as BigQuery, GraphQL, and Grafana.

### LOCATION

Bracknell

### EXPERIENCE

#### SOFTWARE ENGINEER, LOVEHOLIDAYS JUNE 2024 - PRESENT

- Developing, testing, and releasing meaningful changes prioritising positive customer outcome
- Investigating and monitoring alerts, errors, and production bugs
- Taking part in on-call duties to ensure smooth experience for the users
- Working with data products such as BigQuery to understand the customer impact
- Providing support to non-technical colleagues by implementing simple features in Sanity, answering queries, and dealing with requests

#### SOFTWARE ENGINEER, ELSEVIER MAY 2021 - MARCH 2024

- Participated in user research sessions to understand the user journey, and their pain points, and gather feedback for improvements
- Successfully tested, modified, and deployed new features in fortnightly releases
- Established a better understanding of testing within the team as the testability expert and improved existing testing processes. Gave a company-wide presentation advocating the enhanced testing strategy.
- Improved app accessibility by introducing the jest-axe library for screen-readers and participating in workshops and pair programming sessions. Received an award for implementation of accessibility into the main flow of the product
- Took the initiative to create debugging tools to help efficiently resolve support queries
- Worked closely with the Microsoft team to discuss their new releases and better understand how it may help Mendeley Cite

### EDUCATION & QUALIFICATIONS

**Master's Degree in Tourism Management** - University of Westminster

**Testing JavaScript** - Kent C Dodds

**Green Belt for TypeScript** - Security Journey

**Front-end Software Engineering Job Simulation** - Skyscanner

### SKILLS

TypeScript, JavaScript, GraphQL, React, Redux, React Testing Library, Jest, Playwright, Fluent UI, Grafana, New Relic, Sentry, Prometheus, BigQuery, Jenkins, Git, Github, Jira, Figma, Sanity, SDLC, A/B Testing
